

# Package ‘gemini.R’

August 26, 2024

**Title** Interface for 'Google Gemini' API

**Version** 0.5.2

**Maintainer** Jinhwan Kim <hwanic@gmail.com>

**Description** Provides a comprehensive interface for Google Gemini API,  
enabling users to access and utilize Gemini Large Language Model (LLM) functionalities directly from R.  
This package facilitates seamless integration with Google Gemini, allowing for advanced language processing,  
text generation, and other AI-driven capabilities within the R environment.  
For more information, please visit <[https://ai.google.dev/docs/gemini\\_api\\_overview](https://ai.google.dev/docs/gemini_api_overview)>.

**License** MIT + file LICENSE

**Depends** R (>= 4.0.0)

**URL** <https://github.com/jhk0530/gemini.R>

**BugReports** <https://github.com/jhk0530/gemini.R/issues>

**Encoding** UTF-8

**Imports** base64enc, cli, httr2

**RoxygenNote** 7.3.2

**Suggests** testthat (>= 3.0.0)

**Config/testthat/edition** 3

**Config/Needs/website** rmarkdown

**NeedsCompilation** no

**Author** Jinhwan Kim [aut, cre, cph] (<<https://orcid.org/0009-0009-3217-2417>>)

**Repository** CRAN

**Date/Publication** 2024-08-26 15:50:13 UTC

## Contents

addHistory . . . . .	2
gemini . . . . .	2
gemini_chat . . . . .	3
gemini_image . . . . .	4

**Index****6**

<code>addHistory</code>	<i>Add history for chating context</i>
-------------------------	--

**Description**

Add history for chating context

**Usage**

```
addHistory(history, role = NULL, item = NULL)
```

**Arguments**

<code>history</code>	The history of chat
<code>role</code>	The role of chat: "user" or "model"
<code>item</code>	The item of chat: "prompt" or "output"

**Value**

The history of chat

<code>gemini</code>	<i>Generate text from text with Gemini</i>
---------------------	--

**Description**

Generate text from text with Gemini

**Usage**

```
gemini(prompt, model = "1.5-flash", temperature = 0.5, maxOutputTokens = 1024)
```

**Arguments**

<code>prompt</code>	The prompt to generate text from
<code>model</code>	The model to use. Options are '1.5-flash', '1.5-pro', '1.0-pro'. Default is '1.5-flash' see <a href="https://ai.google.dev/gemini-api/docs/models/gemini">https://ai.google.dev/gemini-api/docs/models/gemini</a>
<code>temperature</code>	The temperature to use. Default is 0.5 value should be between 0 and 2 see <a href="https://ai.google.dev/gemini-api/docs/models/generative-models#model-parameters">https://ai.google.dev/gemini-api/docs/models/generative-models#model-parameters</a>
<code>maxOutputTokens</code>	The maximum number of tokens to generate. Default is 1024 and 100 tokens correspond to roughly 60-80 words.

**Value**

Generated text

**See Also**

[https://ai.google.dev/docs/gemini\\_api\\_overview#text\\_input](https://ai.google.dev/docs/gemini_api_overview#text_input)

**Examples**

```
## Not run:  
library(gemini.R)  
setAPI("YOUR_API_KEY")  
gemini("Explain dplyr's mutate function")  
  
## End(Not run)
```

---

gemini\_chat

*Multi-turn conversations (chat)*

---

**Description**

Generate text from text with Gemini

**Usage**

```
gemini_chat(  
  prompt,  
  history = list(),  
  model = "1.5-flash",  
  temperature = 0.5,  
  maxOutputTokens = 1024  
)
```

**Arguments**

<code>prompt</code>	The prompt to generate text from
<code>history</code>	history object to keep track of the conversation
<code>model</code>	The model to use. Options are '1.5-flash', '1.5-pro', '1.0-pro'. Default is '1.5-flash' see <a href="https://ai.google.dev/gemini-api/docs/models/gemini">https://ai.google.dev/gemini-api/docs/models/gemini</a>
<code>temperature</code>	The temperature to use. Default is 0.5 value should be between 0 and 2 see <a href="https://ai.google.dev/gemini-api/docs/models/generative-models#model-parameters">https://ai.google.dev/gemini-api/docs/models/generative-models#model-parameters</a>
<code>maxOutputTokens</code>	The maximum number of tokens to generate. Default is 1024 and 100 tokens correspond to roughly 60-80 words.

**Value**

Generated text

**See Also**

[https://ai.google.dev/docs/gemini\\_api\\_overview#chat](https://ai.google.dev/docs/gemini_api_overview#chat)

**Examples**

```
## Not run:
library(gemini.R)
setAPI("YOUR_API_KEY")

chats <- gemini_chat("Pretend you're a snowman and stay in character for each")
print(chats$outputs)

chats <- gemini_chat("What's your favorite season of the year?", chats$history)
print(chats$outputs)

chats <- gemini_chat("How do you think about summer?", chats$history)
print(chats$outputs)

## End(Not run)
```

**gemini\_image**

*Generate text from text and image with Gemini*

**Description**

Generate text from text and image with Gemini

**Usage**

```
gemini_image(
  image = NULL,
  prompt = "Explain this image",
  model = "1.5-flash",
  temperature = 0.5,
  maxOutputTokens = 1024,
  type = "png"
)
```

**Arguments**

<code>image</code>	The image to generate text
<code>prompt</code>	The prompt to generate text, Default is "Explain this image"
<code>model</code>	The model to use. Options are '1.5-flash', '1.5-pro'. Default is '1.5-flash' see <a href="https://ai.google.dev/gemini-api/docs/models/gemini">https://ai.google.dev/gemini-api/docs/models/gemini</a>

temperature	The temperature to use. Default is 0.5 value should be between 0 and 2 see <a href="https://ai.google.dev/gemini-api/docs/models/generative-models#model-parameters">https://ai.google.dev/gemini-api/docs/models/generative-models#model-parameters</a>
maxOutputTokens	The maximum number of tokens to generate. Default is 1024 and 100 tokens correspond to roughly 60-80 words.
type	The type of image. Options are 'png', 'jpeg', 'webp', 'heic', 'heif'. Default is 'png'

**Value**

Generated text

**See Also**

[https://ai.google.dev/docs/gemini\\_api\\_overview#text\\_image\\_input](https://ai.google.dev/docs/gemini_api_overview#text_image_input)

**Examples**

```
## Not run:  
library(gemini.R)  
setAPI("YOUR_API_KEY")  
gemini_image(image = system.file("docs/reference/figures/image.png", package = "gemini.R"))  
  
## End(Not run)
```
