

Internet Assigned Numbers Authority (IANA) Plenary Report

IETF 121, Dublin

Key Highlights and Milestones

- IANA met or exceeded all service level agreements for protocol parameter functions from July to September 2024.
- More than 750 IETF-related requests have been processed since IETF 120. These include document reviews, registry creation, new registrations, modifications to existing registrations, and deletions.
- Created 34 new registries and two registry groups (reflected as new unique registry URLs) since IETF 120.
- Reviewed IANA Considerations for all documents on the IETF 121 WG agendas.

Overview of Activities

Performance in brief

Last 12 months (i.e. October 2023 – September 2024)

*Does not include Private Enterprise Number (PEN) Requests

More comprehensive monthly statistics reports can be found at <https://iana.org/performance>

Since IETF 120

Request Type	Total
Last Calls	46
IESG Evaluations	53
RFC Publication Approvals	50
Media Types	20
Ports and Port Modifications	20
New Private Enterprise Numbers	484

Customer satisfaction in brief

At the conclusion of request processing, IANA sends a short survey to customers to ask them whether they were satisfied with our performance. These are only issued for requests directly sent to IANA (i.e. not through the RFC editorial process), and no more than one survey is sent per customer every 60 days even if they conduct multiple transactions.

	July	August	September
Response Rate	33.3%	53.8%	70.7%
Satisfaction	100%	100%	85.7%

Updates and initiatives

- We are developing a prototype for new registry pages based on our existing data model, which is intended to provide enhanced navigability and improved visual presentation. We intend to prototype this on a few select registries to begin with before expanding it to all 3000+ registries. Part of this work is to establish a standardized approach to canonical URIs in order to make them more reliably citable, including down to the individual registration (i.e. row) level. Additionally, JSON exports will be made available for each registry and registry group.

Additional information

- IANA will maintain “office hours” during IETF 121. Look out for our booth, and bring any questions you may have about your Internet Drafts, how registries operate, or anything else IANA-related.
 - Our booth will be manned Monday through Thursday, from 9am to 5pm
 - If we’ve stepped away, or you’re attending remotely, you can always drop us a note at iana@iana.org, and we will follow up with you

- We always encourage authors to speak with us about their prospective IANA registrations early in the document development process. Send questions and requests for early document reviews to iana@iana.org
- Our index of protocol parameter registries can be found at <http://www.iana.org/protocols>
